

End-to-End Packaging & Label Workflows

Cut costs, raise profits and prepare for growth

Certified end-to-end workflows integrate your business and production processes so you can thrive as a highly automated, informed and profitable packaging and/or label converting enterprise.

What is the Suite?

The Packaging Suite is EFI's next step in the evolution of the EFI product portfolio. It expands on EFI's existing offerings with an even stronger focus on automation, optimization and new revenue generation.

The Suite's component-based approach utilizes integrated, smart software to automate and optimize your business from your clients' desktops throughout administration, production and delivery. This approach moves the emphasis away from individual operations and software packages to a holistic offering that combines smart software, end-to-end certified workflows and synchronized development/release cycles to deliver a comprehensive performance-enhancing portfolio that scales with your needs.

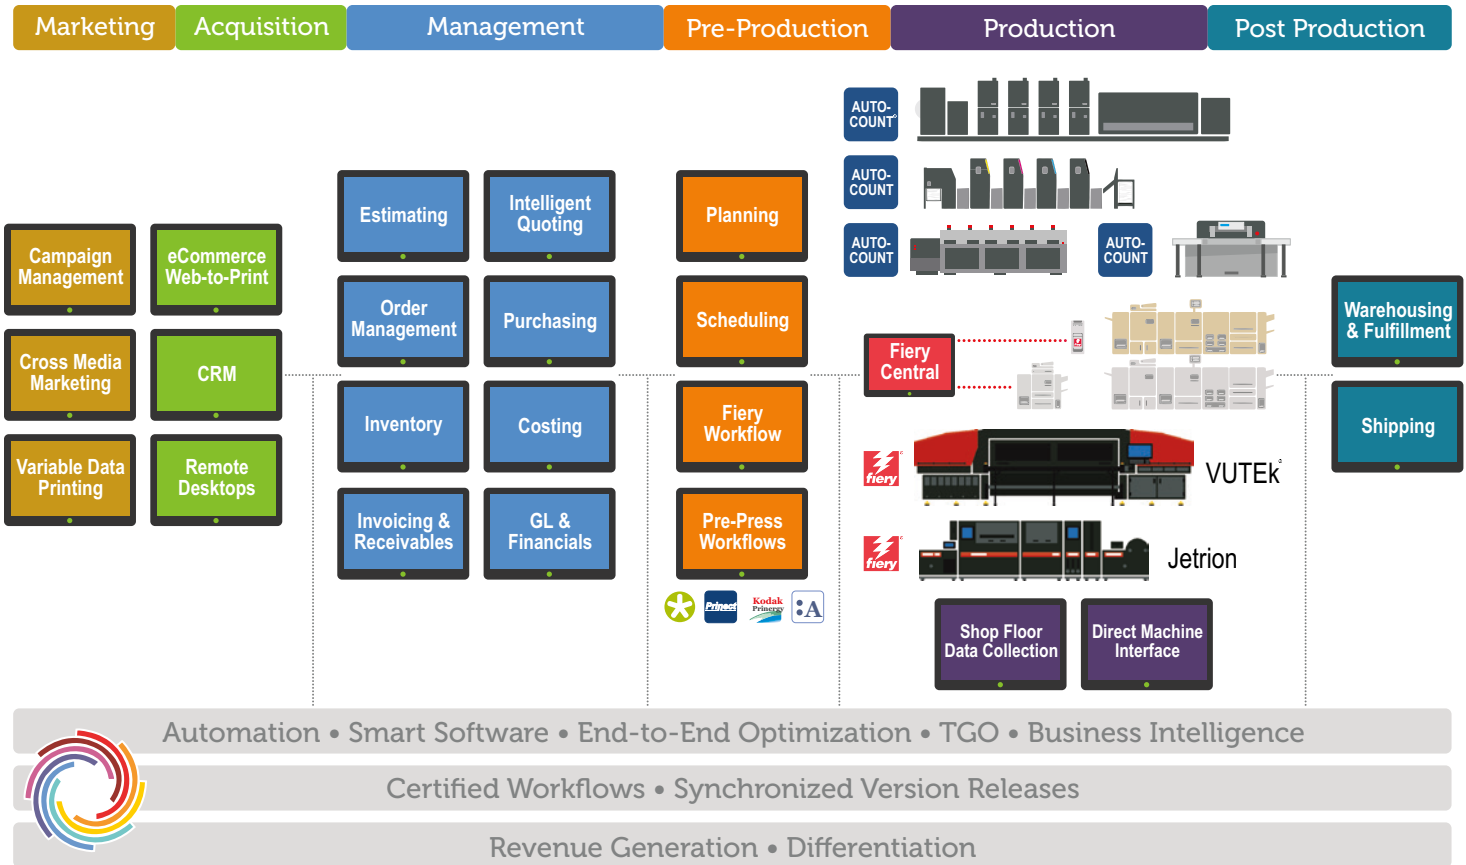

EFI Packaging Suite

The Packaging Suite design lets you to jump in today to address your most pressing business needs while providing an infrastructure that will evolve with your business without requiring re-investment or core component retraining.

The *efi* Digital Ecosystem

The EFI Packaging Suite is part of the EFI Digital Ecosystem, ready to help your business capture moments of opportunity for long term success.

An Industry-focused Business Strategy

The EFI Packaging Suite is built on the Theory of Global Optimization (TGO) – a Lean business strategy developed for the printing and packaging industry. The Packaging Suite takes the global component of TGO to new levels, delivering out-of-the-box workflows that provide rapid ROI to meet your immediate needs while scaling for growth and new revenue opportunities.

“Our company has gotten larger, and our jobs more complex. We wanted seamless integration and business intelligence without having to write a program ourselves.”

KEVIN KELLY, CEO, EMERALD PACKAGING

Certified End-to-end Workflows

Certified Packaging Suite workflows address real world situations to deliver higher efficiencies, improved throughput and sustainable process and profit improvement throughout your enterprise. Each workflow, consisting of a core ERP solution and multiple value-added Suite components, has been designed, built and tested to ensure all integrations have passed EFI's rigorous certified testing and deployment standards. The result... a validated and scalable solution that brings people, processes, technology and data together as one end-to-end, integrated packaging enterprise.

Packaging Suite Value

- Delivers out-of-the-box, end-to-end optimized workflows
- Integrates and automates your business and production operations
- Builds the highest level of efficiency and cost optimization
- Provides visibility across your business supporting informed, proactive decisions
- Maximizes profits from existing jobs while supporting the development of new revenue streams
- Evolves with your business as you grow and tap new markets
- Backed by the industry's leader in innovative software

"We've been able to replace multiple management, operation, estimating and inventory systems. The Packaging Suite does it all, and integrates it all."

JASON SCHMEDDING, TEAM ADVISOR
TC TRANSCONTINENTAL PACKAGING SCHEDULING GROUP

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
