

Fife Guiding Solutions

Reduce Downtime and Increase Throughput

Guiding

From the thinnest plastic film to the thickest steel strip, from the narrowest webs to the widest rolls, Fife delivers a full line of advanced guiding systems and products to reduce downtime and increase throughput.

Metals/Strip

Off-tracking problems can force slower line speeds and cause damage to your equipment, roll coverings and even the strip itself. Fife offers a full range of rugged, yet precise products designed to handle the extreme demands of strip guiding.

Guiding Solutions To Improve Productivity

Web guiding uses a combination of sensors, controllers and actuators or guiding systems to control the web path accurately.

Increased Productivity and Throughput

Improved Product Quality

Decreased Scrap

Guiding

- Pre-wired, fully integrated web guiding systems
- Web Guide Controllers
- Power Units
- Sensors
- Actuators
- Positioners
- Offset Pivot Guides
- Steering Guides
- Unwind/Rewind Guides

Metals

- Strip guiding Systems
- Furnace Guides
- Hole Detection
- Capacitive Sensing
- Inductive Sensing

Inspection

- Video Enhanced Web Inspection Systems
